### **Features**

- Degree of protection: IP66 (housings), IP65 (front panel)
- · Stainless steel desktop housing available
- · Several national layout variants
- PC-compatible-keyboard with 105 short stroke keys
- Designed to use in hazardous area, category II 2G (zone 1)
- USB or PS/2 interface with USB cable
- Certified for ATEX and IECEx Zone 1/21
- UL listed for USA and Canada

# **Application**

Die EXTA2-\*--K3-\*\*-U-\*-\* is an intrinsically safe keyboard with trackball. The interfaces of mouse and keyboard are separated IS-Circuits. Both circuits are lead trough in one connecting cable. (connecting cable is inculded in delivery). The keyboards are designed for panel mounting or for installation in a housing.

USB intrinsic safety barrier for stand-alone keyboard applications

## Chemical resistance of keyboard foil

The keyboard foil is manufactured from a biaxially aligned polyester-based material and therefore has a greater resistance to solvents. The foil is stronger and more durable than other standard foils used on keyboards and front panels, such as polycarbonate and PVC.
